

ACUSTRIP®

The Diagnostic Detective®

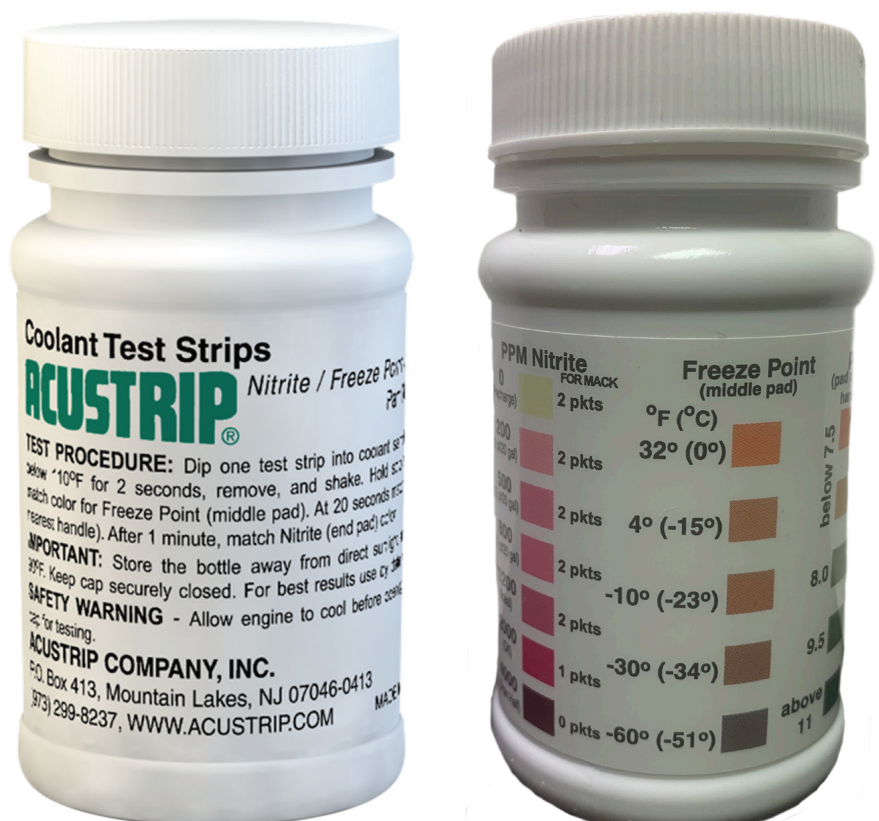

3001M

Detecting engine problems before they become costly engine repairs or breakdowns!

The Acustrip Test Strips are designed as a quick and easy test to determine when the Antifreeze Coolant needs service. Maintaining your fluids at satisfactory levels will minimize costly repairs and improve vehicle performance. Regular fluid inspection will assist in detecting engine problems before they become costly engine repairs or inconvenient breakdowns.

For Antifreeze Coolant:

- *Check the coolant level regularly*
- *Check the freeze point and boil over protection level*
- *Check the corrosion protection level*
- *Quickly dip and read the condition of your coolant.*
- *Adjust as recommended*
- *Complies with ASTM;NAP;TMC*
