

ACUSTRIP announces the availability of their popular hydrocarbon test in a convenient environmentally friendly package. The ACUSTRIP 480508 Hydrocarbon Test is used by professionals to detect the presence of hydrocarbons (i.e. from fuel, gasoline, kerosene, oil, etc.) in diesel exhaust fluid (DEF), water, antifreeze coolant or soil. The test strips are now available in a display-ready seed package that reduces plastic waste by eliminating the bottle and simplifies field testing. The hydrocarbon test joins the growing list of products available in a seed package including the 1550 series of coolant tests and the popular CTS-3 series.

**About Acustrip**

Founded in 1987, Acustrip Company has a well-deserved reputation as the manufacturer and provider of the world’s best coolant test strips. Acustrip also manufactures diagnostic test strips for brake, power steering, water quality and Diesel Exhaust Fluid. Acustrip manufactures products for OEM distribution and has been approved by major auto and equipment manufacturers. The test strips are developed in compliance with MAP UICS and ASTM &TMC recommendations.
